SUMMARY

Software developer with about 1.5 years of professional experience across mobile (Flutter) and web (React). Currently building Forward, a CMS and HRMS mobile app, with GetX and a Laravel REST API backend, covering business workflows such as orders, leads, visits, stock, and attendance. Previously built responsive React and Tailwind CSS websites and an e-commerce admin dashboard. Comfortable moving between mobile and web codebases and working closely with backend APIs.

SKILLS

Mobile: Flutter, Dart, Dio, GetX (state management), MapLibre GL

Web: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, React Router; TypeScript

State & Data: React Hooks, Context API, REST API integration (Axios, Fetch), Laravel backends, Firebase Cloud Messaging

Practices: Responsive/mobile-first design, reusable components, code refactoring, debounced search, pagination

Tools: Git, GitHub, Postman, VS Code, Vercel

WORK EXPERIENCE

Software Developer | Plaza Sales *Feb 2026 – Present*

- Build features for Forward, a CMS and HRMS mobile app, using Flutter and GetX with REST APIs against a Laravel backend.
- Developed forms, list pages, and detail pages for core modules: customer, product, order, collection, visits, lead, follow-up, and party stock.
- Built new screens and refactored existing code to meet changing requirements, including a multi-step form flow.
- Built a MapLibre GL map showing retailers and dealers, with category filters.
- Implemented debounced search, filters, and scroll-based pagination for controlled data fetching in large lists.
- Worked on leave management and remote attendance features.
- Occasionally contribute to the product's React web dashboard.

Frontend Developer | Passion Chasers Pvt. Ltd. *May 2025 – Feb 2026*

- Built a responsive company portfolio website showcasing services, training programs, and contact information using React and Tailwind CSS.
- Developed a travel and tour company website with tour listings, price-range filtering, and dynamic, reusable UI components.
- Created an e-commerce admin dashboard for managing products, orders, and users, focused on efficient data handling and a clean layout.
- Ensured mobile-friendly, cross-browser-compatible layouts, improving usability across devices.

PROJECTS.

Asset Track — Asset Tracking Dashboard — *React, Tailwind CSS, .NET, REST API*

- Built reusable UI components for asset listing and tracking, integrating backend REST APIs across responsive desktop and mobile layouts.

Doha Tours & Holidays DMC — Travel Company Website — *Laravel, Blade, Tailwind CSS*

- Built a responsive website for a travel company, with tour listings, price-range filtering, and dynamic UI components.

SD Mart — Food & Medicine Delivery Platform — *Laravel, Blade, Tailwind CSS, .NET API (Team Project)*

- Contributed frontend development on a food and medicine delivery e-commerce platform, building UI for product catalog, cart/checkout, and order flows, integrated with Laravel and .NET backend APIs.

Bike Rental System — Booking Platform — *React, Tailwind CSS, Framer Motion*

- Built a responsive rental booking UI with animated transitions and interactive states using Framer Motion.

Productivity App — Project & Task Management — *Flutter, Firebase (Firestore, Auth), GetX (Personal Project, In Progress)*

- Building a Flutter app with a service-controller-model architecture and nested Firestore data paths for user-scoped projects and tasks, with real-time streams.

TaskFlow — Multi-Role Task Management App — *React, Tailwind CSS, React Router, Chart.js (Personal Project)*

- Built a task management app with separate admin and employee roles, using AuthContext for authentication and protected, role-based routing.
- Added a charts view with react-chartjs-2 for task and progress data

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)
Himalaya Darshan College (Tribhuvan University) | 2021 – 2026
